

More words on Triple-Flex™  
Ultra-High Efficiency  
Condensing Boilers...

**“These boilers save money for schools. In these economic times that makes a difference.”**

– Dr. Glenn Krueger, Superintendent  
Kankakee Valley School Corporation

“Our old boiler used way too much energy. We were short cycling all the time. Starting and stopping and not keeping the school warm. We wanted the highest efficiency we could find and Triple-Flex™ boilers seemed to be the highest.”

“Year over year we saved \$8723.38 in five months and it was a colder winter. We don’t even have the system tweaked yet. I expect additional 5-10% savings this winter. One night it was 20 below zero and we were only at 85-90% capacity. At 20 below! This technology is certainly at a higher level than anybody else on the market. It condenses at 160 degrees! We’ll be looking at Triple-Flex boilers for anything we do.”

“We’ve had no issues but a huge advantage is how simple and easy everything is to access. Easy, fast maintenance.”

Thank you Dr. Krueger.

**Two words on the new  
Bryan Triple-Flex™ boilers...**

**SAVE MONEY.**

Only Bryan Triple-Flex™ boiler technology delivers minimum 90% operating efficiencies. **GUARANTEED.**

Now you can get the industry’s highest condensing boiler operating efficiencies from the flex tube leader, Bryan. Competitors often talk about higher efficiencies in best-case scenarios with low water temperatures that occur with higher outside temperatures and reduced heating loads. Only Bryan Triple-Flex™ boilers deliver MINIMUM EFFICIENCIES of 90% in these demanding operating conditions –

- 160-degree return water
- 180-degree supply water
- 100% maximum load

Triple-Flex boilers deliver up to 99% efficiencies in new or retrofit applications, even if the building heating system design does not meet the “typical” condensing boiler requirements. Plus these boilers feature easy-to-replace stainless steel flex tubes, a hybrid metal fiber burner with sub 30 ppm NO<sub>x</sub> performance and Bryan’s legendary rugged construction. Triple-Flex technology smashes the “old school” concept of boiler operating efficiencies.

**From Bryan’s vantage point Triple-Flex technology sets the new benchmark in boiler operating efficiency. Get the whole story now at [bryanboilers.com](http://bryanboilers.com).**
